

THE PRINCE AKATOKI
LONDON

SUSTAINABILITY MEASURES

Measures currently in place

- Motion detector lights.
- LED lighting used throughout the hotel.
- TV systems are all lower energy, from B to A+.
- Building Management System (BMS) control temperature system which does not exceed 30 degrees.
- Double-glazed windows.
- Admin departments going paperless.
- Heating Exchange Unit- reclaims hot and cold air for energy (for gas boilers).

Measures new for 2021

- Installing Combine Heat & Power system (this recycles heat from appliances to be used as energy to power other building systems).
- Recycling inserts to be put into all rooms for guest recycling.
- Food waste recycling.
- Suppliers to deliver in sustainable containers to minimise the use of plastic.
- Green car service to be launched for guests to book sustainable taxis.
